5 Steps to Begin your SMB for Passwordless Authentication.

Achieve the top benefit of a passwordless solution in your organization:

99% of IT leaders see benefits to a passwordless solution in their organization.

If you already use a LastPass passwordless solution, you're ready for a passwordless shift.

Before you start:

1. Assess your current authentication process to determine how you can implement a passwordless solution. If your organization has already implemented a passwordless solution, you can use LastPass with it.

2. Create a long-term strategy for passwordless adoption. Consider when and how you can roll out passwordless authentication to your organization.

3. Test each new passwordless solution to ensure it integrates with your technology stack.

4. Evaluate your employees’ needs and provide support where they need it.

5. Be ready to go in and out, with LastPass protecting your organization.
