

LastPass MSP, Part of LogMeIn Partner Network

Grow your business while delivering best-in-class security with the LastPass MSP solution.

The LastPass MSP solution provides Managed Service Providers (MSPs) visibility and control over every access point of their customer's business. With its integrated single sign-on and password management solution, LastPass allows your company to generate incremental revenue while seamlessly managing your customers' accounts in a single pane of glass.

With LastPass, your company can provide your customers a best-in-class solution to securely protect their passwords and manage access to applications. In addition, your technicians will be able to provision seats and manage accounts from one central admin console.

By partnering with LastPass, your MSP will gain competitive margins while providing value to your customers.

Designed for MSPs

This solution was designed specifically for Managed Service Providers, with one central admin console, flexibility to add or remove seats, and monthly billing options.

Grow your Business

Generate new revenue streams by providing a security solution with competitive margins in \$13.4 billion growth market.

Partner with a Proven Leader

LastPass offers an all-in-one solution for best-in-class single sign-on and password management to meet the security and access needs of your customers.
